

DEMO EVIDENCE PACKAGE

Harbor Property Claims evidence package

SAMPLE-PACKAGE-001 · Generated May 23, 2024, 10:30 AM CDT

DEMO DISCLOSURE — This package organizes available records. It does not determine coverage, cause, property damage, or claim outcome.

Package context

Organization: Harbor Property Claims
Prepared by: Demo Evidence Team
Client: Sample Client A
Client reference: CLIENT-A
Claim / internal reference: DEMO-2405
Insurance carrier: Sample Mutual
Internal notes: Fictional context for demonstrating package organization.

Property and event

Property: 1450 Sample Ridge Road, Cedar Rapids, IA
Coordinates: 41.9779, -91.6656
Approximate date of loss: May 21, 2024 (America/Chicago)
Event-day observation window: May 21, 2024, 12:00 AM CDT to May 22, 2024, 12:00 AM CDT

Evidence summary

Observed · Event-day observed gust 54.0 mph	Reported · Nearby reported gust Not available	Reported · Nearby reported hail 1.25 in	Warning · Warnings at property 1	Observed · Event-day precipitation 0.82 in
---	---	---	--	--

Event-day observations include a maximum gust of 54.0 mph from ASOS via NWS Local Storm Reports archive, 3.5 miles SW from the property. Nearby Local Storm Reports include hail up to 1.25 in within the searched radius. 2 nearby Local Storm Reports were returned. 1 archived warning polygon intersected the property point. These records describe available evidence near the property and do not establish damage, causation, coverage, or claim outcome.

Weather-event timeline

Warning · May 21, 2024, 4:42 PM CDT · National Weather Service archived warning Severe Thunderstorm Warning included the property The property point falls inside the archived warning polygon.
Observed · May 21, 2024, 5:05 PM CDT · KCID · ASOS one-minute archive · 7.2 miles Nearby station recorded a 51.8 mph gust The KCID station recorded the maximum event-day gust returned in this sample.
Reported · May 21, 2024, 5:14 PM CDT · NWS Local Storm Reports archive · 2.7 miles 1.25 inch hail was reported nearby A Local Storm Report was recorded northeast of the sample property.

Precipitation context

Station: The Eastern Iowa Airport (KCID)
Event day: 0.82 in
Prior 24 / 72 hours: 0.84 in / 1.16 in
Prior seven days: 2.04 in

Data-quality notices

- This is a fictional sample package and must not be used as a weather record.

Package limitations

- All records on this route are fictional sample data provided only to demonstrate report formatting.
- Nearby observations and reports do not establish conditions at the subject structure.
- Weather evidence does not determine physical damage, causation, insurance coverage, or claim outcome.

Imagery context

Before capture: May 18, 2024, 12:12 PM CDT · SAMPLE-S2-BEFORE
After capture: May 23, 2024, 12:10 PM CDT · SAMPLE-S2-AFTER
Available optical imagery is contextual. It cannot establish roof-level damage and is not analyzed in this report.
